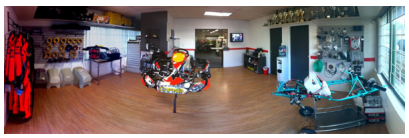
2013 is finally upon us and in typical RaceLab style we are continuously pushing forward and growing our programs, product ranges in order to offer our clients the best options out there as well as to offer newcomers even more opportunities to experience the most karting has to offer. As a Canadian based operation we feel that growth of our sport in our area is paramount and cannot be overlooked which is why we created our beginners intro programs that we featured on various social deal websites in an effort to reach larger audiences.

With that success we have decided to upgrade our program for this year with more karts, and programs being added to our roster including the new intermediate program for those who tried the beginners intro and want to do some more lapping to see if this sport is for them.

We have upgraded our Showroom recently as well to allow us more display space so that we can display our ever increasing inventory in order to keep our customers supplied at competitive prices locally as we strongly feel this is necessary to offer the Lower mainland a place to come visit they can call their "karting home". You are urged to come by and visit see our shop, have a coffee and discuss what might be best for your karting program.



With that said we have also added a new line of chassis for 2013 with the Formula K brand out of Maranello,Italy. Owned by Andrea Bertolini 5 Time FIA GT1 World Champion and factory Ferrari/Maserati driver. The Formula K line is an addition that will allow us to tackle a market that is demanding on quality and competitiveness as well as keeping the budget in line.
